

Erasmus Mundus

Master Course on Economics and Management of Network Industries

UNIVERSITÉ
PARIS-SUD 11

The objective of our Erasmus Mundus Masters Course is to produce highly qualified professionals, able to manage and regulate network industries and infrastructures.

Our masters students will learn simultaneously the engineering, the economics and the management principles that are relevant in the network and infrastructure industry area.

The duration of the master will be of one or two years depending on CV for a total maximum of 120 ECTS, and the instruction languages will be Spanish, French and English.

A number of scholarships, funded by the European Commission, are available for highly qualified third-country graduate students (21 000€/ year).
