Bi1 Extra credit (worth 2 iClicker points):
Due in Lecture Tuesday, May 15, 2012

Pick a Caltech faculty member doing research that is related to the Central Dogma in some way (i.e. utilizing key biomolecules, or exploring departures from the Central Dogma--several names were provided to you in DKN's lecture). Look up one of their papers, site the paper specifically, and, using your own words:

A.) Explain its connection to the Central Dogma
B.) Explain what the key findings of the paper were
C.) Discuss why you think this type of research is important
